

Albannach is a new contemporary Scottish bar and restaurant situated in the heart of London on the south side of Trafalgar Square. This exquisite establishment boasts a ground floor bar, mezzanine restaurant, and lower ground vaulted cocktail lounge.

Mann McGowan® were contacted by the restaurant owners as they had to provide a 30 minute fire barrier at the top of the staircase, thus providing fire separation between the lower and ground floor levels. As the interior has a light and airy feel, the barrier needed to allow as much light into the stairwell as well as not being obtrusive to visitors as they first arrive through the buildings ornate front doors.

The Pyrovista® 30 screen was over 6 metres in length incorporating both 90 and 135 degree angles x 4 metres high. To provide the 30 minutes integrity and insulation, the screens and doors were glazed with 15mm Pilkington Pyrostop

glass, bedded on Pyroglaze® 30 intumescent seals.

An added benefit of Mann McGowan® suggesting this specification is that the decibel reduction offered is 38dB. The frames were all fitted on a Sunday, and glazed on the following Monday morning whilst the restaurant was closed, thus causing minimum disruption

Technical Services

Our services to architects and Specifiers include CPD technical seminars, specification writing and site visits
