

Architects: Brock Carmichael  
 Principle Contractor: Kier North West

Kier undertook the construction of a three storey registry building on the existing campus.

A bespoke fire resisting glazed system was designed by Mann McGowan in conjunction with the project architects to provide 30/30 fire resistance.

The joinery package undertaken by us included skirting, plinths, architraves and timber panels.

The screens were manufactured from American White Oak and glazed with 15mm thick Pyrostop and Pyroglaze® seals. The solid timber panelling had a White Oak veneer applied to the face.

**Solid White Oak Veneered Panelling**

**Raked Pyrovista® screen 7.5 metres x 3.06metres**

### Technical Services

Our services to architects and Specifiers include CPD technical seminars, specification writing and site visits
