

Architects: Curl La Tourelle
 Principle Contractor: Miller Construction

The Peckham Academy project included the demolition and refurbishment of half the existing building and the construction of two new state of the art teaching blocks in addition to a sports hall. The construction had to take place during school term time with the new buildings covering some 73,500 sq ft. This accommodates over 1450 pupils. Mann McGowan has manufactured and installed Pyrovista® 60 fire resisting glazed screens which provide 60 minutes fire integrity and insulation. 21mm thick Pyrostop glass was used in conjunction with Pyroglaze® glaze tape. In some areas the face of the glass had a sandblast finish to provide privacy. The Pyrovista® screens also provide sound attenuation in the region of 40db

Pyrovista® fire screens position behind the external glass curtain walling allowing natural light into classrooms

As part of the contract package Mann McGowan® manufactured non fire rated timber screens to the library, as well as manufacturing security screens, lockers, reception desks and other ancillary joinery items.

Technical Services

Our services to architects and Specifiers include CPD technical seminars, specification writing and site visits
