

# Gleeson Banks on Firestile®

The combination of  
**Pyrovista®**  
**Fire Resisting**  
**timber screens and**  
**Firestile®**  
**fully glazed doors**  
**achieved a stunning**  
**internal effect on**  
**this high quality**  
**Residential**  
**Development.**

Gleeson Homes Southern Division has recently completed this high specification development named 'Mirage' which boasts stunning views across the Sandbanks Peninsula in Dorset.

The building has 28 new apartments, a number of which have been fitted with our Pyrovista® and Firestile® glazed fire resisting doors and screens.

The main project requirement was to provide a minimum of 30 minutes Integrity in relation to Fire and Class A Safety in relation to the Glass. Each pane in turn was then fitted with Certifire approved Pyroglaze® intumescent seals finished in white to match the timber.

A further request from the client was to make the complete fire barrier design as unobtrusive as possible, therefore Mann McGowan fitted concealed hydraulic closers into the head of the door leaves. Each of the doors were then hung on 1½ pairs of lift off hinges.
