

Pyrolock Intumescent Kit

Where fire resistance is concerned, metal lock mechanisms are an obvious weak point in any timber door and in the event of a fire, they can have a seriously detrimental effect on the integrity of both door and frame.

Fitting Pyrolock will overcome this problem, providing a high performance intumescent gasket that will insulate the timber, retard the charring process and maintain the fire resistance to an acceptable level.

Pyrolock Kits can be manufactured using both Type 15 & Type 36 Interden material as manufactured by Dr Wolmans, part of the BASF Group.

They can also be supplied from Graphite based intumescent if required.

Features and Benefits

- Proven fire resistance for both 30 & 60 minute applications
- Wide range of templates to match leading brands
- Colours available: White, Brown & Black
- Non-standard sizes and self-adhesive versions available on request
- Easily fitted to a huge variety of lock makes and styles
- Holes, cut-outs and notches incorporated if desired
- Can be supplied in 1mm & 2mm Interdens (M.A.P.)
- Can be supplied in 0.5mm, 1mm & 2mm 500F Graphite

Pyrolock Intumescent Kit
